

**DATE:** May 20, 2008  
**FROM:** Charlie Weber, Director of Marketing  
**SUBJECT:** News Release – Galaxy To Move

---

For Immediate Release –

### **Galaxy Associates Plans Headquarters Move in June**

Galaxy Associates is a Cincinnati, Ohio based global specialty chemical, equipment and service company, founded in 2002 by chairman Mel Fisher— a pioneer in the specialty chemical industry since 1964. Our four business segments include products and services for the Industrial (Metal Working and Metal Finishing), Automotive, Fleet Truck Wash and Pulp and Paper Plant industries. Galaxy also has a broad line of general industrial products and multi-purpose cleaners for many industrial application needs. Today, Galaxy also offers a wide range of safer, greener technologies, such as our “Neutral Cleaners”.

Galaxy’s numerous manufacturing sites and strategically located warehousing installations throughout the US insure product availability and on-time delivery. Galaxy Associates is a company that continues to evolve for the ultimate benefit of the customer. Since the company’s founding, our four major acquisitions have been pursued and completed in order to achieve that goal everyday.

The end result has been significant growth now requiring us to move to larger facilities. The new headquarters building which will include a full service laboratory will be located in Blue Ash, OH. approximately nine miles north of our current facility. The new address will be 4370 Malsbary Rd.; Cincinnati, OH. 45242-5653. Galaxy’s phone numbers will remain the same.

Further information is available through Galaxy’s National Sales and Service force by contacting us at 800-661-9443.
